Please contact Chuck or any of our sale day team if you are unable to attend the sale. Phone bids will be handled as if you are present.

Nutrition

Our feedstuffs are rumen-based, with rations formulated by LD Henrichs of McNess Feeds. The bulls are fed high-roughage nutrition with developmental emphasis on long-lasting breeding animals.

Health

The health protocol of our herd, including these bulls, is proactive and comprehensive. Booster/pre-sale regimen includes IBR, BVD, P13, BRSV, with Lepto-Vibrio & Harjo bovis. Also reboosted Mycoplasma, Foot Rot and Pink-Eye. They have been wormed and poured again. Our herd health management is administered under Dr. Teri Todd with consultant Mark Nold, through the product lines of Nold Animal Supply. For more information, see the link on our website.

Customer Service

Give us a call if you're having a problem or have a question about one of our bulls. We always want to work with you to "make it right," within reason. We breed and feed for durability and stand behind what we sell.

Semen

All bulls are semen tested. A report for each animal is available upon request. NFA retains one-third semen interest on all bulls sold.

**Keep checking website and Facebook page
for updated sale bull information.**

NOLDANGUS.COM

NOLD FAMILY ANGUS

To Our fellow Cattle Producers:

What a spring we had and are still having. In computer speak, I guess it would be called user friendly. That being said, we take some pride in our herd being able to literally weather whatever weather Mother Nature tends to throw at us. But the boys and I are still very thankful for the 2024 calving conditions, over 2023. It will be awhile, before any of us forget that one!

And so here are the 2024 bulls. They're a darn good set. We remain focused on big picture balance: cattle that do the best job of utilizing your resources; cattle that can be easily handled; cattle that are structurally correct. To us, this is functional herd production at its best, developed for longevity and optimum marketplace value.

Besides the herd sires listed in this catalog, we also have some Synergy calves in the offering. It's a line that produces calvability and great mothering ability. We love talking about ALL our bull calves—but boy, we wish you could see the cows that produce them. I have to say, we are pretty proud of the girls that make up our herd.

I can't close without talking about the dogs, specifically the Labs. Last year we had Semper at the bull sale. A month later, he was paired with his veteran—he was the 140th dog given away by Labs For Liberty.

Chuck

Thanks for your time, interest and support of Nold Family Angus.

Chuck

He throws tremendously long bodied calves with a lot of thickness on the top. They're the kind of calves Steve Hellwig likes to sell. We've now calves his first daughters and will definitely see his influence carrying forward. He is breeding more consistent than his grandsire, Conneally Spur.

He was the attention getter in Frey's carload for the inaugural Cattlemen's Congress. True isn't your typical calving ease sire offered in commercial semen catalogs. Calves are consistently 70-75 lbs on 1st calf heifers with great vigor! Offers more body length when compared to other contemporary calving ease sires.

He carries on the great Basin Deposit tradition of strongly influencing the carcass side of the equation. But 1226 also does so much more than that. We used him as clean-up on first calf heifers and never had to worry about assisting anything bred to this bull.

This is a generational bull, with so many good things to say about him. We selected this Quality son from Freys and have never looked back. He's big, easy keeping and breeds with so much consistency. His breeds length, frame, thickness and muscle shape in a clean phenotype. His daughters will be great foundation builders for the future.

MARTIN-TRUDEAU INSURANCE

LIVESTOCK DIVISION

A representative from the livestock division of Martin-Trudeau Insurance will be at our sale. A very good breeding bull insurance policy through Martin-Trudeau will be available for each animal purchased on sale day. If you choose to buy coverage, Nold Family Angus will pay HALF of your premium for any bulls you bought, that were \$3000 and over.

Additionally, bulls selling for more than \$3000 are guaranteed for 90 days from first turnout, against breeding injury. If a replacement bull is available, he will be provided. If a replacement bull is not available, credit will be given at next year's NFA bull sale. Credit will be for the purchase price, less salvage value of the injured bull, to be used for the purchase of one replacement bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made prior to Oct. 1, 2024 This is not a mortality insurance policy.

BIRTH WEIGHT & CALVING EASE

University studies in Wyoming and data from Montana and Colorado lend credence to the following conclusions:

1. The birth weight itself influences calving ease by 65%.
2. The female has 60-70% influence on birth weight of her calf.
3. The bull has 30-40% influence on birth weight of his progeny.
4. Pelvic measurement and angle as well as the shape of the calf have 35-40% influence on calving ease.
5. Length of gestation greatly affects birth weight. A fetus can gain over one pound per day in the last days of gestation.
6. Weather and temperature the last 30 days affect the length of gestation.
7. Size and maturity of the cow influence calving ease.

Most commercial producers do not take birth weights. Guessing is as inaccurate as driving with a broken speedometer – what's thought to be 55 mph may in fact be 65 or 70 mpg, and what's thought to be 70-80 lb. may actually be 80-90 lb. Remember, everything is relevant. Increased growth, frame and performance will increase BW. A longer-bodied calf will weigh more. If a calf is expected to have genetics for growth, it will display this prior to birth as well as after. As a rule of thumb, it takes a calf weighing 85 lb. at birth to finish at 1200-1250 lb. A cow should easily give birth to a calf weighing 8% of her own body weight. Thus, a 1200 lb. cow should give birth to a 96 lb. calf with ease.

Continued selection for light birth weights will ultimately reduce the mature sizes and performance of your cattle.

Angus bulls have long been known for their paramount calving ease. If you are breeding heifers, Angus is the go-to breed of choice. But what about the so-called "big" birth weight Angus bulls - where do they fit in? The vast majority of mature cows calve unassisted - it is pretty rare for a mature cow to need assistance, except for abnormal deliveries (backwards, breech, twins, etc.). Data reported to the AAA shows that 99% of Angus cows, second calf or beyond, calve unassisted and only 1% need some type of assistance (abnormal deliveries excluded from this data.) Back to the question at hand: where do the "big" birth weight Angus bulls fit in? Example: If you have a bull with a Birth EPD of +5, he would be 3.2 pounds heavier than the average (breed average BW EPD 1.8) ($5 - 1.8 = 3.2$ pounds difference.) However, his superior growth EPDs mean he will wean bigger calves and put way more money in your pocket than the average Angus bull! The moral of the story: If you are breeding mature cows to an Angus bull, don't make birth weight be your focus.
